SUMMARY

Full Stack Web Developer seeking a career opportunity in web development; leveraging a background in financial and accounting analysis roles, as well as a project management position. Recently received a Certificate in Web Development from the University of North Carolina. Excellent at communicating in Spanish and English, as well as implementing processes and being highly passionate about obtaining results. Recognized for problem solving abilities and using future minded proactive strategies to be a high contributing member of a team. Juan is a quick and eager learner who is judicious, responsible, self-motivated, and a diligent worker. Looking to bring his positive attitude, technical skills and soft skills to the table in order to add value to an organization while continuing to learn and develop new technical knowledge and give back to the web development community.

PROFESSIONAL EXPERIENCE

BPA Professional, Charlotte, NC
Financial Analyst

August 2019 –November 2020

- Worked as a Financial Analyst for a real estate developer in the Charlotte, NC area. Managing and coordinating the financial and accounting processes of various engineering, construction, and investment projects.

- Manages multiple project budgets and schedules, developing a multi-tier financial analysis model for each project, with the focus of analyzing performance data to forecast and create asset value as well as profit and loss statements.

Organization of American States, Washington, D.C.

July 2017 – July 2019

Project Officer

- Managed the financial and logistical processes related to the execution of project activities, including trend analysis, quarterly and yearly budgetary reporting, forecasting, and financial modeling. Working closely with the senior management team daily in order to source external sources of funding.

Microsoft, Charlotte, NC

March 2016 – June 2017

Licensing Analyst

- Created a formula to analyze volume licensing contracts which supported the sales team by processing and customizing prices and quantities. Streamlined operations that were implemented worldwide.

Vizant, Charlotte, NC

December 2015 – March 2016

Excel Specialist

- Analyzed quantitative data from corporate bank statements as well as financial statements in order to simplify complex processes, improve reliability, and achieve cost reductions. Processed this quantitative data into easily understandable graphs for clients.
